### 01 PROFILE

Hello! I love to build applications that solve problems and make businesses thrive. It gets me excited to work on different technologies that meet this goal. As a highly detail-oriented and problem-solving developer, I take pride in translating design mockups into fully functional and visually appealing websites that deliver a seamless user experience. I have hands-on experience building enterprise web applications with a strong aptitude for learning new technologies and skills in meeting aggressive goals. With 4 years of experience, I have become proficient in writing clean, readable, testable, and maintainable code. As a Front-end Developer, I have had the opportunity to build enterprise web applications using frontend technologies.

### 02 EXPERIENCE

#### Alx\_africa, Nairobi, Kenya — Software Engineer Intern

AUG 2022 - PRESENT

- Served as a dedicated and supportive Intern in a fast-paced environment.
- Collaborating with cross-functional teams.
